

# Bias/Super Bias

- 1) Play at 1.75 grams tracking weight.
- 2) Tighten fixing screws securely to clamp cartridge as tightly as possible to the headshell.
- 3) Follow the turntable or arm manufacturer's instructions for fitting the cartridge.

## Rear Cartridge View

## Packing

Rega have not tried to create a false impression of expense by using an elaborate package. We have used the most simple and cheap carton possible to avoid transit damage, thereby using the saving to spend more on the cartridge itself - ensuring better value.

**Remove the location tags on the stylus guard for use on in-situ cartridge.**
