Dear folks at Rega,

This is a letter of appreciation. My wife and I are new owners of a Rega Saturn CD player, and to say that we are pleased would be an understatement. The sound is the nearest I have yet heard to good analog from a CD. I never hoped to hear sweet massed strings, rather than the grainy sound typical of a digital recording of a symphony orchestra. I don't know how you did it, but you have achieved what I had thought was impossible. There is transparency and "air" in the sound, the highs are smooth and not a bit glassy or brittle, and the base is tight and well-defined. We are having great fun listening to discs from our collection, and discovering that the technology is obviously there in those little five-inch silver platters. It must be, because as we upgrade our system, the sound keeps getting better. It has never been better than now. Thanks for a superb product.

Yours very truly,

A handwritten signature in cursive script, appearing to read "Gerald Hjelm".
